

PRESS RELEASE

Date: February 10, 2010
For Immediate Release

JETNET To Show New Views, Expanded Database At HELI-EXPO 2010

UTICA, NY – JETNET LLC, the leading provider of corporate aviation information, will be featuring their new market “Views” at HELI-EXPO 2010, the world’s largest tradeshow dedicated to the civil helicopter industry. As part of an interface and information upgrade to its flagship Evolution service, JETNET has created new Views, convenient “at a glance” summaries of market and aircraft information for its subscribers. Each View is a summary page that gathers data points from throughout the Evolution program and compiles them into a single screen of well organized lists, graphs, photos and tables for easy assessment of marketplace status and trends. Each is a different summary configuration, one of six from which users can choose, depending on their needs. The annual HELI-EXPO convention & exposition, sponsored by the Helicopter Association International, will be held at the George R. Brown Convention Center in Houston, TX from February 21–23, 2010. JETNET’s booth is #3017.

The Views complement JETNET’s popular Evolution interface, and the company has already seen them greatly simplify their clients’ work. For example, where previously subscribers searched multiple modules of the Evolution interface to gather data on one aircraft or market, now all the relevant information is presented at a glance in the Model Market Summary View. Aircraft top-level information, market conditions, and history are all provided and updated as often as once a minute for Live service customers via JETNET’s web-based network. Links display an aircraft’s time on market, service history, photos, avionics, detailed specifications, financial documents and more, and specific JETNET STAR—**Statistical Analysis Report**—data tables are now included for in-depth presentation of market and fleet dynamics.

JETNET’s helicopter service is the largest and most complete civil helicopter database available, encompassing 125 market-relevant turbine and piston rotary wing models, over 30,000 total rotary wing airframes, around the globe. Helicopter data gathered by JETNET’s staff includes detailed owner/operator information, base locations, interior/exterior photos, comprehensive airframe and power plant specifications, transaction histories and much more. For the aircraft resale market, JETNET offers the most complete listing of helicopters available for sale, trade or lease throughout the world. The new Views are a free upgrade to their existing service.

JETNET President Vincent Esposito believes the Views will further solidify his company’s position as a service leader in the field. “We asked our clients what they wanted most,” he says. “They answered, and the results are in our new services and features. We don’t believe in resting on your laurels. We know you never stop learning, getting smarter, and finding ways to know more than your competition, so we’ve come up with even more ways for you to use JETNET Evolution to stay one step ahead.”

JETNET also offers Helicopter Market Summary Reports, monthly market summaries on helicopters covered by JETNET dating back to January 2006. Each report includes Airframes for Sale and Airframes Sold, and data on the number for sale, pricing, average airframe and engine times, average days on market, and more.

Since 1988, JETNET has delivered the most comprehensive and reliable business aircraft research to its exclusive clientele of aviation professionals worldwide. JETNET is the ultimate source for information and intelligence on the worldwide business aircraft fleet and marketplace, comprised of some 60,000 airframes. The Company offers services for both fixed wing and helicopter aircraft. Headquartered in its state-of-the-art facility in Utica, NY, JETNET offers comprehensive user-friendly aircraft data via real-time internet access or regular updates.
